

Border Crossings: a spiritual journey in medicine

Border Crossings is a ringing affirmation of the power of faith, family, and community. A witty and profound memoir of a woman's life lived in the tumultuous currents of the twentieth century. Dr. Barnet, a Harvard-trained neurologist, tells of her American girlhood affected by the Great Depression, World War II, and anti-Semitism. She recounts her struggles for personal and religious identity as she finds her way as a physician, scientist, mother, Christian, and advocate for human rights. In telling the story of The Family Place, the refugee center she founded in Washington, D.C., she illuminates the lives of real people caught up in violence and war, and buffeted by the relentless forces of globalization, people who come to the United States seeking freedom and a better life. She speaks for the rights of children everywhere to a secure, loving, and experience-rich childhood, and invites the reader into her reflections on her own life and her process of finding her way as a physician, mother, daughter, Christian, progressive, and children's advocate.
