

Readers of this third edition shall find updated information to heighten new or existing Internet sites, including: the right tools (software, servers and critical equipment); sending automatic information (e-mails, files and more); real-time communications; setting up secure sites; advertising, traffic builders and Internet add-ons; and the latest scripting languages for spicing up pages. Whether the goal of the user is doing business on the Internet or providing a valuable resource over the Web, this book covers it all, from having a strategy for creating an Internet site to finding out the specifics for managing an Internet site. The CD included with this book contains trial versions of various server management programs, as well as basic Web authoring tools.
