

Introduction to Digital and Data Communications

This text on the data and network communications field is intended to be a junior or senior level text in an Electronics Technology or Technician program. The main feature that will set this text apart is that it is designed to present a solid background in all aspects of current Data and Network Communications. Written in a clear and easy to understand style, this text includes coverage of the latest technologies not only in terms of software and hardware but also in terms of topical content coverage.
