

The investigation into esoteric curiosities related to strange events in 20th Century San Bernardino Valley leads into even more unexpected territory. In this volume, the author explores the connections between the Inland Empire of Southern California and H.P. Lovecraft, Aleister Crowley, The Zodiac Killer, the mysterious NYMZA, lost civilizations, voodoo, and the suspected murder of Harry Houdini. The hidden occult elements of Riverside, California, are identified on a grid linked to possible Hekate veneration, expanding the stage of high strangeness discovered in the first volume. New associations are revealed as the shadowy path leads from past to the present.
