

## Esec 91: 3rd European Software Engineering Conference, Esec 91, Milan, Italy, October 21-24, 1991, Proceedings (Lecture Notes in Computer Science)

The third European Software Engineering Conference follows ESEC87 and ESEC89. This series of conferences was set up by the European societies with the aim of providing an international forum for researchers, developers and users of software engineering technology. The need for a meeting point to discuss new results and useful experiences was clear from the large amount of high-quality European software engineering research in recent years, stimulated, for example, through major European research programmes. The 22 papers in these proceedings were selected from 133 papers submitted from 26 different countries. They cover a fairly broad range of themes such as formal methods and practical experiences with them, special techniques for real-time systems, software evolution and re-engineering, software engineering environments, and software metrics. Invited papers by well-known experts address further important areas: perspectives on configuration management, software factories, user interface design, computer security, and technology transfer.
