

## Francis Thompson & the Ripper Paradox

This novel is the first that introduces the English Catholic poet Francis Thompson (1859-1907) as a ripper suspect. It is based on a short year 2000 non-fiction true-crime book called *Paradox*, by the same author. Like *Paradox* this horror story is about how Thompson was the Ripper. Unlike *Paradox* however it paints a portrait of Thompson as the antichrist. It draws on facts surrounding the ripper case and Thompson to explain how his rise began as the perpetrator of the cluster of 5 terrible murders of 1888 in London's East End. This novel tells that Thompson sought to raise the dead and then stay alive after his own passing by hiding behind history and in our minds. The book shows how, in line with key dates in the Christian calendar and precise locations, each murder was calculated to strike blows against all cornerstones of the Victorian establishment. It explains that Thompson was a failed priest and doctor who had extensively studied the occult, and was well read in Ecclesiastical history and ancient religious ritual. Readers can learn how after the murders he continued in similar dark arts primarily in his writing. Who fits the F.B.I profile of a serial killer in demographics and history? Who was in the area? Who had a weapon? Who consorted with prostitutes? Who knew how to cut up bodies? Whose behavior or writing showed intimate knowledge of such crimes or possible guilt? Francis Thompson is the only suspect out of the hundred whose name can be given for all. Thompson has gathered the most circumstantial evidence in a century. The murders of these lower class prostitutes, ended seemingly inexplicably. It is thought that it is largely because of the mystery of the murderers identity that the Ripper crimes have become legendary. This novel's assumption is that the Ripper murders may have been the least of a series of crimes we may never comprehend? Thompson had a violent

childhood, doomed medical school training and a continual fascination with death. His life and verse reflect his downward drug induced spiral into vagrancy. In 1888 he was suicidal and in possession of a dissecting scalpel. Having failed in his attempt for the priesthood, he had trained as a surgeon for six years. After drifting through London a homeless man for three years, he was then living in Londons Limehouse district. The murders centered on the neighboring district of Whitechapel. His addiction to opium was constant for the past decade. During the murders, he was seeking out a prostitute for whom he had a fancy. Upon meeting Thompson, she vanished as he became delirious. Thompsons writings are filled with allusions to the occult and murder and he possessed the necessary skills, a dissecting knife, and was near to the murderers and consorted with prostitutes, he merits closer study. Added to this that he would have hardly have been able to furnish an alibi, and he harbored a possible motive. The content of the infamous Ripper letters seem to strangely parallel his circumstances. His age, childhood, social settings, and lifestyle parallel the profile of serial killers as proscribed by the F.B.I and the C.I.D. This novel opens up the mind for the reader of the words first serial killer. It is both strangest tale ever told and a true-crime book like no other.
