

Studienarbeit aus dem Jahr 2011 im Fachbereich Informatik - Internet, neue Technologien, Universidad EAFIT, Sprache: Deutsch, Abstract: Due to technological developments in mobile devices and wireless technologies, mobile applications are conquering the world these days. In this work, we will first have a look at the specific features, advantages and existing categories of such applications. Secondly, the emergence of application stores, their characteristics and the according changes in the distribution process of mobile applications will be presented. Finally, the strengths, weaknesses and features of mobile banking will be described and possible ways to improve the adaption of mobile banking applications will be discussed.
