

## Backward down the Mountain

An inspiring collection of true tales following a globe trotting high tech troubleshooter who unexpectedly encounters God and is never the same afterwards. Imagine Indiana Jones meeting Jesus and the series of wild, fun, and sometimes scary adventures that follow. Filled with humor, suspense, miracles, travel, and interesting characters Backward the down Mountain takes a reader on a journey to find the best things in life. Some comments from readers: I am changed. These adventures are extraordinary. A real page turner. I devoured it in the first couple of days of winter break, and I loved it! It was really fun to read and really inspiring. Backward down the Mountain takes a reader to the back streets of New Delhi and the sidewalks of New York. To the ancient walls of Jerusalem and the mono lithic landscape of inner city Chicago. To pristine woods of deep river country, gorgeous California ocean vistas and many more astounding historic and off the beaten path locales. Can you imaging finding yourself caught in a Soviet interrogation room or on a wild backward ride down a winding mountain road without breaks? How about face to face encounters with bears in the wild or exploring a mysterious dark treasure chamber in the bowels of an old Indian fort. Packed with courage, compassion, and hope this collection of stories tells what can happen when an ordinary person chooses to believe and say yes to the life that follows.
