

If you are a coach, service professional, or an entrepreneur that isn't using an E-Book to build your brand you have found the right book! The E-Book Blueprint is a complete action step guide that will not only help you understand how an e-book can be used to grow your business, but provides free guides and a step-by-step checklist to help you plan, write, edit, design, publish, and even market your first e-book! The best part about the book is it lays out every step and the most cost-effective resources you can use to do-it-yourself! You will easily save yourself months of research and \$1000's of dollars by utilizing "The E-Book Blueprints Checklist" and the well-researched list of modern resources for each phase. While it is nearly impossible to keep up with every new technological advance, the advent of the e-book is an evolutionary leap. Now anyone with a good idea can bypass the traditional publishing gatekeepers who often used to get in the way of getting that idea in front of others who may be able to benefit from it. If you are a coach or a professional who offers services to your clients, then it can be used as a tool to generate buzz about your business, make you more credible, and also provide some nice residual income as well! PGA Golf Teaching Professional Matt Reagan breaks down the e-book creation process into very easy to follow action steps that could help anyone create an engaging e-book. Matt was frustrated a few years ago when he did not know what it would take to write or publish an e-book. He noticed there were a lot of pieces to creating an e-book, but there was really no central book or resource that covered everything from start to finish. All of these questions began to race through my head because he wanted to do it right the first time, and wanted a system to follow that works. Do I need software to write a book? Is there a format I should follow? How do I sell it online? How do I get it on the Kindle? Can I sell a book through my website? Do I need an ISBN? How do I create my own website? Do I need a website? Can I distribute it on the Nook? How much money is this going to cost me? The list goes on and on. "The E-Book Blueprint" is exactly what Matt wanted when he wrote his first 3 e-books. It is a go-to template that can guide anyone with a basic sense of writing to start pumping out e-book after e-book and have fun doing it. Spend less time researching how to structure each phase or the resources you are going to use. This can be very demotivating with all the options available and prevent you from even starting! Matt has done his research. His middle name should be "Efficient" and his coaching personality not only shines at the golf course, but for helping others with their business as well! Purchase "The E-Book Blueprint" now and start Planning, Writing, Editing, Designing, Publishing, & Marketing your first e-book today.
