

SAP Business Intelligence: Data Extractors Step by Step

This book is designed to teach you the detailed steps needed to work with data extractors on a SAP platform. As more fortune 500 companies and midsize corporation rely on applications that are able to run their entire Enterprise, the SAP application has begun to take the lead in the Enterprise Resource Planning environment. With this book we will cover (Generic Extractors, LO-Extractors and COPA Extractors). In this book I give you screen shots that outline the process of data extractors along with video tutorials that walk you through the configuration process.
