

It is astonishing how little insight into the science of economics many of the men who move in the midst of active life possess. Hence it is that even Jews faithfully repeat the cry of the Anti-Semites: We depend for sustenance on the nations who are our hosts, and if we had no hosts to support us we should die of starvation. This is a point that shows how unjust accusations may weaken our self-knowledge. But what are the true grounds for this statement concerning the nations that act as hosts? Where it is not based on limited physiocratic views it is founded on the childish error that commodities pass from hand to hand in continuous rotation. We need not wake from long slumber, like Rip van Winkle, to realize that the world is considerably altered by the production of new commodities. The technical progress made during this wonderful era enables even a man of most limited intelligence to note with his short-sighted eyes the appearance of new commodities all around him. The spirit of enterprise has created them.
