

Over 40 and Changing Careers

This book has been written as an autobiography and to inspire those who are looking to change careers a little later in life and possibility even go back to school. My book begins with my decision to work on my bachelors degree, knowing I would not finish until I was over age 40, gaining experience within my new career field, working on my certification, finding my first job in a new career, and more challenges that came afterwards and how I got past them.
