

Users Guide to Propolis, Royal Jelly, Honey, and Bee Pollen: Learn How to Use Bee Foods to Enhance Your Health and Immunity. (Basic Health Publications Users Guide)

The food products of bees have long been attributed with many health benefits. They can lead to greater stamina, increased resistance to disease, and, counter-intuitively, often help reduce pollen allergies. Scientific studies have revealed that bee propolis, royal jelly, honey and bee pollen are rich sources of antioxidant phytochemicals - vitamin-like substances similar to those found in common vegetables. In this Users Guide, Dr. Broadhurst explains the scientific rationale behind bee foods and describes how they can improve health.
